

DigitalOcean

CURRENTS

Currents: DigitalOcean's research report on how SMBs use cloud services

Small and medium-sized businesses make up a huge part of the economy, but many solutions cater to enterprises, and SMBs face unique challenges when it comes to running their business and selecting technology solutions. To gather in-depth information about SMBs of all types and their challenges and use of cloud solutions today, DigitalOcean worked with research agency AspenFinn to conduct research with three groups:

- **Traditional SMBs:** Businesses with less than 500 employees who provide non-technology products to customers
- **Tech-focused SMBs:** Businesses with less than 500 employees who provide technology-focused or hybrid products to customers
- **Enterprises:** Businesses with over 500 employees

To answer our questions surrounding business challenges and identify trends regarding SMBs and cloud usage, a survey was conducted with 2,400 IT decision makers in 48 countries. The main sample consists of a roughly equal number of respondents in each of the three business types. A full methodology can be viewed in the appendix of this report.

Summary of Findings

Key Insights

SMBs need simplicity at a good price from their cloud providers

There is a knowledge gap amongst Traditional SMBs

COVID-19 has caused increased reliance on the cloud

Cloud native businesses have unique characteristics and challenges

The COVID-19 pandemic has accelerated technology adoption by small and medium sized business.

The COVID-19 pandemic forced businesses to adapt and rethink how they operated, which included a reassessment of their technology infrastructure and use of cloud services. The majority of businesses (65%) reported an increased reliance on cloud solutions due to the pandemic and, once this switch was made, 92% reported that their reliance on cloud solutions continued to increase in 2021. With this growth, it has become clear that business needs and challenges vary across size and type of business.

Enterprise Businesses have a dedicated staff for managing their IT solutions and cloud services. These IT staff concentrate on technology, and their top business challenges (after the impact of the pandemic) are to ensure their technology meets the needs of consumers (20%), to ensure technology meets the needs of their business (18%), and to keep up with the technology curve (9%).

Tech-Focused SMBs (small/medium sized businesses) also have a focus on technology, but their IT decision makers may not be employees who are dedicated to managing their IT solutions. The IT decision makers are either technology employees, owners, CEOs or presidents, and thus are often pulled in multiple directions. Tech-focused SMBs face similar technology challenges as Enterprise Businesses, however, they are more likely to also have other business challenges like meeting revenue targets (7%) and keeping down the cost of goods sold (5%).

Traditional SMBs are the least focused on technology when it comes to running their business, but they do face technology challenges. The IT decision makers at traditional SMBs are typically owners, CEOs, and Presidents that have to balance the technology challenges with other business challenges. Ensuring their technology meets the needs of the consumers (7%) and their business (5%) as well as keeping up with the technology curve (9%) are just as much of a challenge as keeping down overhead costs (8%), maintaining productivity (8%), hitting revenue targets (9%) and keeping down the cost of goods sold (7%).

Traditional SMB IT decision makers are also the most likely to struggle with managing their IT infrastructure, with only 46% feeling that it is easy to maintain and modify, and they are the most likely to say that finding the time to maintain and manage their infrastructure is their top tech challenge (12%).

Cloud service solutions need to be tailored based on size and type of business.

There are several factors when choosing a cloud infrastructure solution that are 'must-haves,' including security and features of the solution itself. Security of a cloud infrastructure being the primary consideration for all business types, with 25% of Enterprise Businesses, 21% of Tech-Focused SMBs and 20% of Traditional SMBs citing this as the most important consideration when selecting a cloud infrastructure solution. However, looking at secondary factors when choosing cloud infrastructure solutions we find differences in the varying types of businesses.

The next most important considerations for Enterprise and Tech-Focused SMBs are the functionality and features (13% Enterprise & 17% Tech-Focused SMBs) and the reliability (13% for both Enterprise and Tech-Focused SMBs) of the cloud solution. Traditional SMBs face the added obstacle of cost. The cost of the solution is a top consideration for 17% of Traditional SMBs, putting it on the same tier as security (mentioned by 20% of Traditional SMBs). Once they know a cloud infrastructure solution is secure and affordable, they then look to assess the functionality (13%) and reliability of the solution. Traditional SMBs would also benefit from a technology solutions that are easy to implement, as only 46% of Traditional SMBs find their IT infrastructure easy to manage.

Different sized businesses need different cloud architectures to meet their needs. When we examined usage of multi-cloud and hybrid-cloud solutions, we find that Tech-Focused SMBs and Enterprises are both more likely than Traditional SMBs to use multi- or hybrid-cloud models. Additionally, the Tech-Focused SMBs are more likely to consciously choose a multi-cloud environment than the two other groups, with 59% of Tech-Focused SMBs stating they consciously chose a multi-cloud setup.

These findings demonstrate that, while businesses' cloud setups get more complex as they grow, both Traditional SMBs and Tech-Focused SMBs have specific pain points and unique considerations when choosing a cloud provider. SMBs require simplicity at a good cost and a provider that can grow with them, and Traditional SMBs need more education on how to best utilize cloud services.

Understanding Technology Needs and Challenges

SMBs of all types are more likely to have their Owners, CEOs, or Presidents managing their cloud services.

	Enterprise	Tech-focused SMB	Traditional SMB
Job title of the person responsible for managing cloud services	Tech titles (CTO, CIO, Director of IT)	Tech titles, Owner, CEO, President	Owner, CEO, President
Is managing cloud services that person's top priority?	Top priority & top priority among other IT priorities	Top priority among other IT priorities	Top priority among other IT priorities (27% have non-IT responsibilities as well)
How SaaS solutions are managed	IT department	IT department	By the person or department using each solution

S3 - Which of the following categories best describes the size of your company/organization? Enterprise N=497, Tech focused SMB N=499, Traditional SMB N=487 Q15 - How are SaaS solutions typically managed at your business? Q23 - Whether someone else or yourself, what is the job title of the person most responsible for managing your company's cloud services? Q24 - Whether it's you or another person in your company, which of the following best explains where managing the business's cloud services falls in terms of the job responsibilities of the person who manages your cloud services? N= Varies, among those who use these services

Enterprise and Tech-Focused SMBs rely on dedicated staff to manage their technology solutions, while most Traditional SMBs do not have the staff

S9 - Regardless of your company's industry, how would you describe what you deliver to your users/customers? Q9 - How many full-time technical staff (IT staff, engineers, developers) does your business employ? Q10 - How many part-time or contractor technical staff (IT staff, engineers, developers) does your business employ? Q11 - Does your business have a dedicated staff member managing your on-premises or cloud infrastructure services? Enterprise N=497, Tech focused SMB N=499, Traditional SMB N=487

With the more technology focused staff employed by Enterprise and Tech-Focused business, comes a greater focus on technology.

Attitudes and Opinions of Technology

COVID-19 and technology challenges are the top concerns for Enterprise businesses and Tech-focused SMBs. Technology challenges, cost of goods and hitting revenue targets are all of equal concern to Traditional SMBs.

The cost of and time needed to manage tech services is the top technology challenge for Traditional SMBs. Security and training are the top technology challenges for Traditional SMBs.

Top Technology Challenges

Cost of technology is likely a greater concern for SMBs because they are paying a disproportionately larger amount of revenue for tech solutions

Average Annual Revenue

Average Monthly Spend for Cloud Services

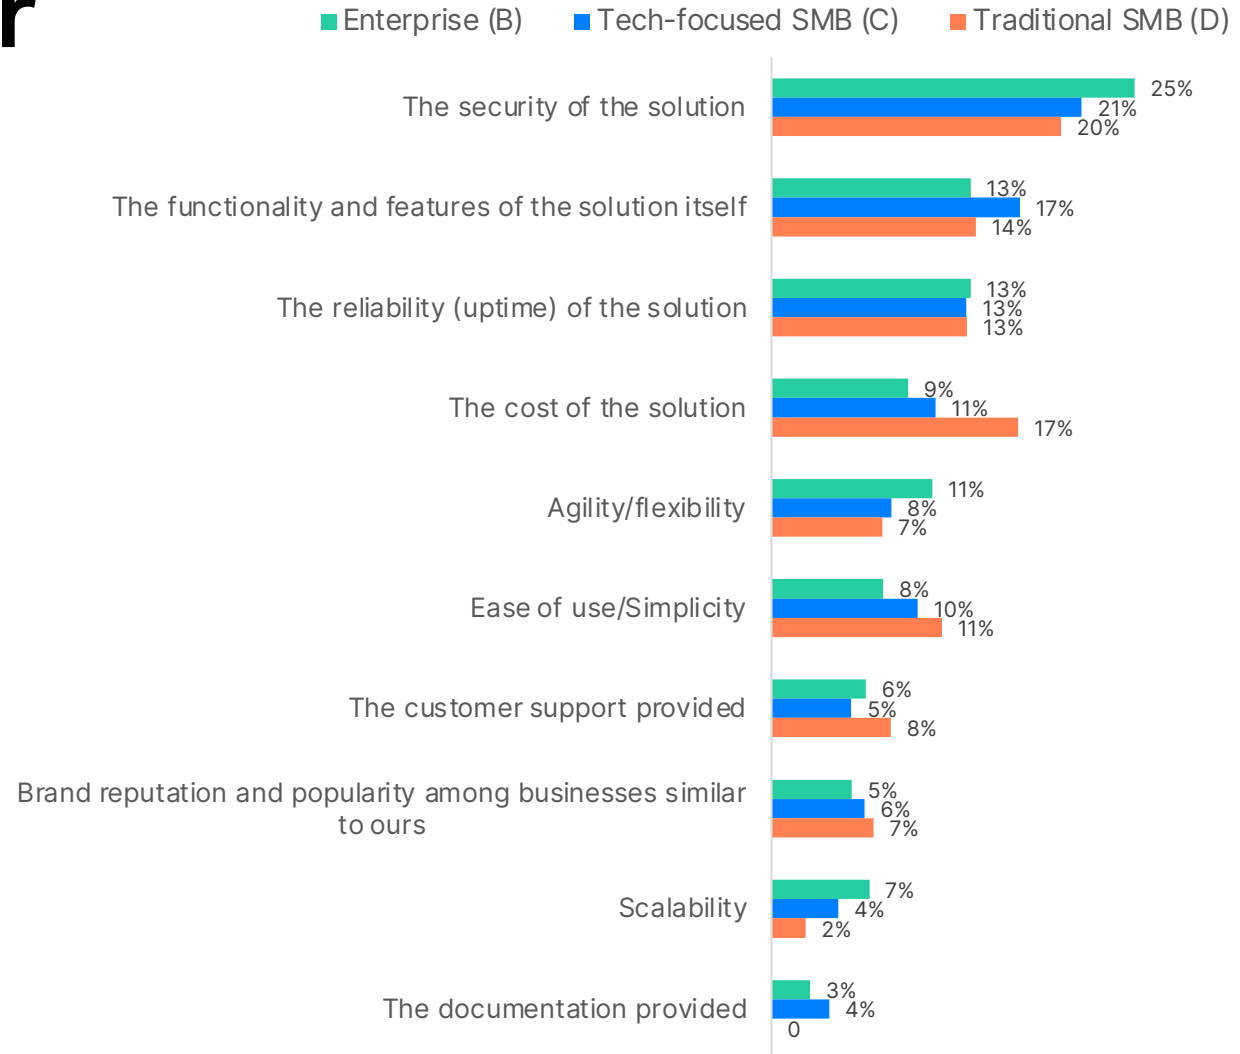

Average Monthly Spend for SaaS solutions:

Security is a top consideration for cloud solutions.

Once a business believes that the cloud infrastructure is secure, they then assess the functionality and reliability of the solution. Traditional SMBs must also make it over the cost hurdle before the functionality and reliability of a cloud solution can be assessed.

Top 3 Most Important Considerations For Cloud Infrastructure Solutions

COVID-19 and Increased Reliance on Cloud Services

COVID-19 recovery is the top challenge facing businesses in 2021 regardless of size.

26% of Traditional SMBs, 25% of Tech-focused SMBs, and 22% of Enterprises list pandemic recovery as their biggest challenge.

COVID -19 has led to an increased reliance on cloud infrastructure solutions with demand increasing into 2021

COVID-19 may have been the spark, but 2021 saw a major increase in reliance on cloud services.

86% say they've increased their reliance on cloud services JUST in 2021 compared to 65% who say the same as the result of the pandemic.

Q5 - How has your business's reliance on cloud solutions, including cloud infrastructure services, software as a service solutions, and private cloud solutions, changed as a result of the COVID-19 pandemic? Total Sample N=1483 Q6 - And, how has your business's increased reliance on cloud solutions, including cloud infrastructure services, software as a service solutions, and private cloud solutions, changed just in 2021? Total Sample N=970 **Among those who increased reliance as a result of Covid

Use of cloud services grew substantially for all segments due to the COVID-19 pandemic and its impact on society.

Those that began relying more on cloud infrastructure solutions as a result of the COVID – 19 pandemic saw their reliance only increase more in 2021, particularly traditional SMBs.

- ■ ■ It has increased significantly
- ■ ■ It has increased somewhat
- ■ ■ It has stayed about the same
- It has decreased somewhat
- It has decreased significantly
- Not sure

Q5 - How has your business's reliance on cloud solutions, including cloud infrastructure services, software as a service solutions, and private cloud solutions, changed as a result of the COVID-19 pandemic? Q6 - And, how has your business's increased reliance on cloud solutions, including cloud infrastructure services, software as a service solutions, and private cloud solutions, changed just in 2021? Enterprise N=497, Tech focused SMB N=499, Traditional SMB N=487 **Among those who increased reliance as a result of Covid

Covid has caused an increased reliance on the cloud everywhere, but it's most pronounced in APAC and South America

Q5 - How has your business's reliance on cloud solutions, including cloud infrastructure services, software as a service solutions, and private cloud solutions, changed as a result of the COVID-19 pandemic? Q6 - And, how has your business's increased reliance on cloud solutions, including cloud infrastructure services, software as a service solutions, and private cloud solutions, changed just in 2021? Europe N=388, Africa N=96, APAC N=684, NA N=451, SA N=399 **Among those who increased reliance as a result of Covid

of Enterprise businesses say cloud solutions have helped their business recover from COVID-19....

of Tech-focused SMBs agree, and...

of Traditional SMBs believe cloud solutions have aided their recovery

■ No
■ Don't know

Cloud services have been a tremendous help to businesses struggling with the impacts of the pandemic. Overall, 69% say cloud has aided their recovery. Tech-focused SMBs and Enterprises are most reliant on the cloud for pandemic recovery, but even 43% of Traditional SMBs say it has helped.

Cloud solutions have benefited everyone by allowing for virtual working and moving operations online

Ways Cloud Solutions Benefited Businesses

	Enterprise (B)	Tech-focused SMB (C)	Traditional SMB (D)
Allowed for more virtual collaboration while employees work remotely	68% ^{CD}	57%	50%
Enabled us to move or increase business operations online (sales, scheduling, streaming, etc.)	58% ^{CD}	51%	44%
Provide a more stable platform and reduced the strain on internal servers	60% ^{CD}	47% ^D	33%
Maintained or increased IT security	56% ^{CD}	48% ^D	29%
Enabled us to scale up/down services as needed	47% ^{CD}	40%	33%

Q8 - In what ways are cloud solutions, including cloud infrastructure services, software as a service solutions, and private cloud solutions helping your business recover from the business impacts of COVID-19? Among those whose business recovered with the help of cloud solutions. Enterprise N=437, Tech focused SMB N=382, Traditional SMB N=211 Letters indicate a significant difference at the 95% confidence level

Traditional SMB Knowledge Gap

Traditional SMBs have a knowledge gap that means they use less cloud solutions and prioritize ease of use

Traditional SMBs have fewer employees than the other business segments and thus have fewer or no employees dedicated to managing their technology. Those that do have many competing priorities and have the additional challenge of not knowing as much about technology and cloud solutions. There is also lower usage of cloud solutions, SaaS and PaaS among Traditional SMBs.

Traditional SMBs are not very familiar with term “cloud native” and thus less likely to consider themselves one.

Familiarity With The Term “Cloud Native”

Just 35% of Traditional SMBs consider themselves a cloud native business compared to 58% of Tech-focused SMBs and 64% of Enterprises

“Digital native” is a familiar term to enterprise business and tech focused SMB’s but not to traditional SMBs.

Familiarity With The Term “Digital Native”

45% of Traditional SMBs consider themselves a ‘digital native’ compared to 71% of Enterprises

Traditional SMBs are the most likely to have a single cloud infrastructure

Single Cloud

Multi-cloud

Hybrid

	Single Cloud	Multi-cloud	Hybrid
Enterprise (B)	11%	44% ^D	44% ^{CD}
Tech-focused SMB (C)	24% ^B	40% ^D	36% ^D
Traditional SMB (D)	46% ^{BC}	29%	16%

Traditional SMBs are more likely to start out on-premises and then move to the cloud

Businesses that started out cloud-based or moved to the cloud
Based on current cloud service users

	Enterprise (B)	Tech-focused SMB (C)	Traditional SMB (D)
Started out completely cloud-based	20%	23%	21%
Started out as hybrid model	45% ^D	41% ^D	22%
Started with an on-premises infrastructure	33%	32%	51% ^{BC}

The majority of tech-focused SMBs with a multi-cloud infrastructure consciously chose multi-cloud

How your multi-cloud infrastructure came to be:

Conscious decision to ensure the right partners or to ensure redundancy

It evolved out of different departments using different providers or because our preferred provider didn't offer everything we needed

It was recommended by an external IT consultant

Enterprise (B)	Tech-focused SMB (C)	Traditional SMB (D)
45%	59% ^{BD}	43%
34%	30%	34%
19%	11%	16%

Traditional SMBs are using fewer types of cloud services than Tech-focused SMBs and Enterprises

Cloud services used:

	Enterprise (B)	Tech-focused SMB (C)	Traditional SMB (D)
Cloud hosting/infrastructure services such as AWS EC2, Azure VMs	74% ^{CD}	66% ^D	44%
Platform as a Service solutions such as Heroku, Google App Engine, Azure App Service	65% ^D	63%	55%
Databases like MongoDB, AWS RDS, Atlas, SQL	57% ^D	53% ^D	24%
Storage products like AWS S3, DO Spaces	45% ^D	40% ^D	21%
Containerization systems such as Kubernetes/Docker	33% ^{CD}	19% ^D	9%

Q21 - Which of the following cloud services does your company utilize? Enterprise N=422, Tech focused SMB N=334, Traditional SMB N=174 Letters indicate a significant difference at the 95% confidence level

Cloud solutions that are easy to use are especially important to SMBs

Cloud infrastructure solutions that are most critical to business success:

Top Tier

Specific brand they use 29%

Specific features 26%

Security 14%
Better integration 3%
Better cloud infrastructure 2%

Cited more by
enterprise (33%), less
by traditional SMBs

Second Tier

Ease of use 13%

Easy to use 6%
Easy access 3%
Better flexibility 3%

Data management 10%

Data storage 5%
Better document/data mgmt. 2%
Better database 2%

Good performance 10%

Quick/fast/agile 4%
Reliable 3%
Works hard/more efficient 3%
Stability 2%

Customer Service 9%

Third Tier

Cost/Value 5%

Better Infrastructure 3%

Cloud infrastructure 2%

Cited more by
traditional SMBs (20%)
and less by Enterprise

Enterprise businesses use the most SaaS solutions, followed by Tech-focused SMBs, with Traditional SMBs using the fewest SaaS solutions

SaaS services used:

	Enterprise (B)	Tech-focused SMB (C)	Traditional SMB (D)
Analytics and data visualization tools	64% ^{CD}	52% ^D	31%
Customer relationship management tools	62% ^{CD}	52% ^D	34%
Sales management tools	49% ^D	42%	33%
Accounting tools	47% ^C	39%	46%

E-commerce platforms	47% ^{CD}	38%	34%
Marketing automation and email platforms	45%	40%	36%
Human resource management tools	50% ^{CD}	35%	26%

Q14 - What type of SaaS solutions does your business utilize? Enterprise N=365, Tech focused SMB N=295, Traditional SMB N=113 Letters indicate a significant difference at the 95% confidence level

Understanding cloud native businesses

Cloud native companies have unique characteristics and challenges

- Cloud natives are more likely to have taken funding: **57% have taken funding** vs **30% of non-cloud natives**
- Cloud natives find hiring and training employees on technology solutions more of a challenge: **43% say it is a challenge** vs **30% of non-cloud natives**
- Complexity is more of a challenge for cloud natives: **34% say complexity of cloud solutions is a challenge** for them vs **25% of non-cloud natives**

Companies that consider themselves to be cloud native are typically tech-focused SMBs or Enterprise businesses and are more likely to consider themselves a startup

Is your company a cloud native?

Enterprise	64%
Tech-focused SMB	58%
Traditional SMB	35%

Consider their company a startup

Cloud native	61%
Non-cloud native	37%

Cloud natives view cloud solutions as critical to their business, cost savings and as a means to enable employees to focus on their core functions.

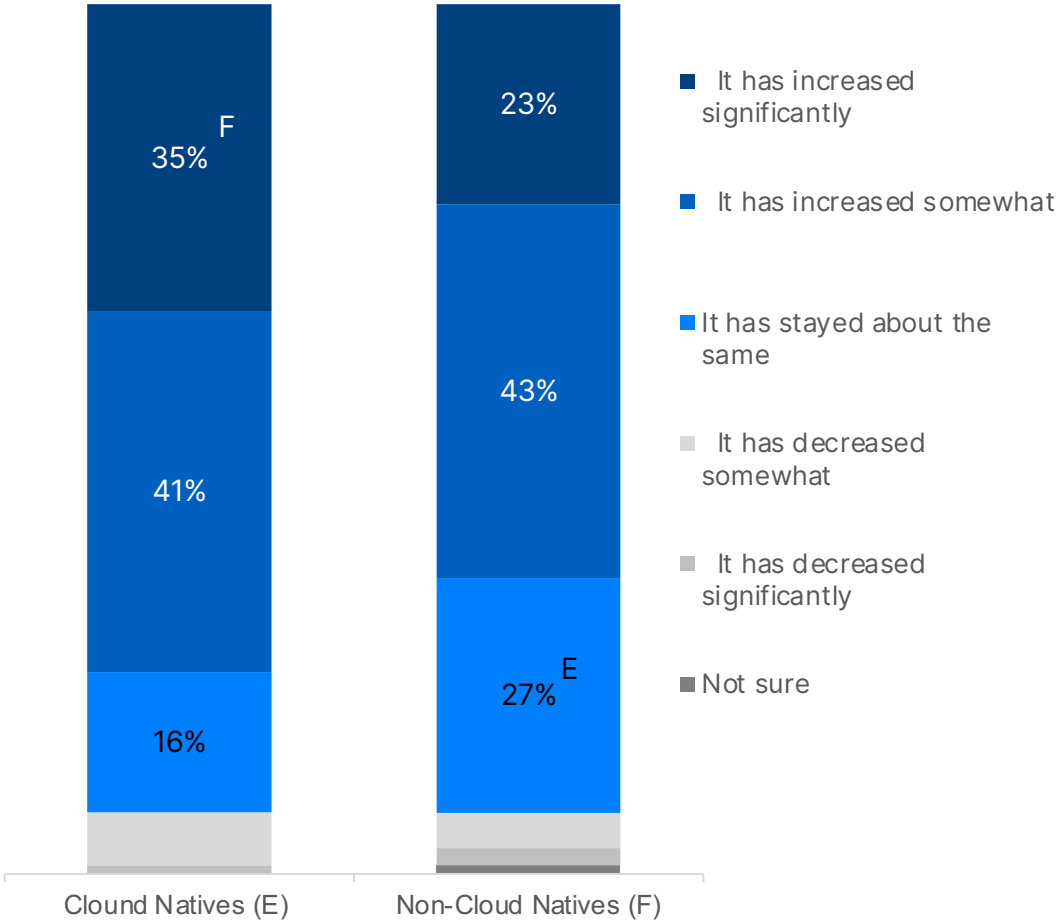

Cloud native companies use more complex cloud setups than non-cloud natives and were more likely to increase reliance on the cloud due to COVID-19

Services used by cloud natives and non-cloud natives

	Cloud native (E)	Non-cloud native (F)
Use a multi-cloud setup	46% ^F	36%
Use containers as a service	23% ^F	10%
Use serverless /Function as a Service	21% ^F	11%

Change In Reliance On Cloud Infrastructure Solutions Due To COVID-19

37 Q4 Which of the below services does your business utilize? Q5 - How has your business's reliance on cloud solutions, including cloud infrastructure services, software as a service solutions, and private cloud solutions, changed as a result of the COVID-19 pandemic? Cloud Native N=647, Non-Cloud Native N= 522. Letters represent a significant difference at the 95% confidence level.

Appendix

India Insights

Enterprise and Tech-Focused SMBs rely on dedicated staff to manage their technology solutions, while most Traditional SMBs do not have the staff

Enterprise businesses have the most robust staff dedicated to managing the company's tech technology solutions with an average of 108 full-time employees and 83 part-time employees.

69% of traditional SMBs have 0 full time technical staff

COVID-19 and technology challenges are the top concerns for Enterprise businesses and Tech-focused SMBs. Keeping up with the technology curve and hiring employees, maintaining productivity, and meeting revenue are also challenges for Traditional SMBs.

Biggest Business Challenges

Ensuring employees are properly trained on how to use technology services is a challenge for all groups, especially tech-focused SMBs and Enterprises.

Top Technology Challenges

COVID-19 recovery is the top challenge facing businesses in 2021 regardless of size.

27% of Traditional SMBs, 31% of Tech-focused SMBs, and 24% of Enterprises list pandemic recovery as their biggest challenge.

of Enterprise businesses say cloud solutions have helped their business recover from COVID-19....

of Tech-focused SMBs agree, and...

of Traditional SMBs believe cloud solutions have aided their recovery

■ No
■ Don't know

Cloud services have been a tremendous help to businesses struggling with the impacts of the pandemic. Overall, 69% say cloud has aided their recovery. Tech-focused SMBs and Enterprises are most reliant on the cloud for pandemic recovery, but even 54% of Traditional SMBs say it has helped.

Cloud solutions have benefited everyone by allowing for virtual working and moving operations online

Ways Cloud Solutions Benefited Businesses

	Enterprise	Tech-focused SMB	Traditional SMB
Allowed for more virtual collaboration while employees work remotely	70%	62%	18%

Regional Insights

COVID-19 has impacted Africa more than any other region and it's less of an issue in Europe – technology concerns still rank second to Covid everywhere

Biggest Business Challenges

Q1 - What is the biggest challenge facing your business today? Total Sample N=1483, Enterprise N=497, Tech focused SMB N=499, Traditional SMB N=487 Letters indicate a significant difference at the 95% confidence level

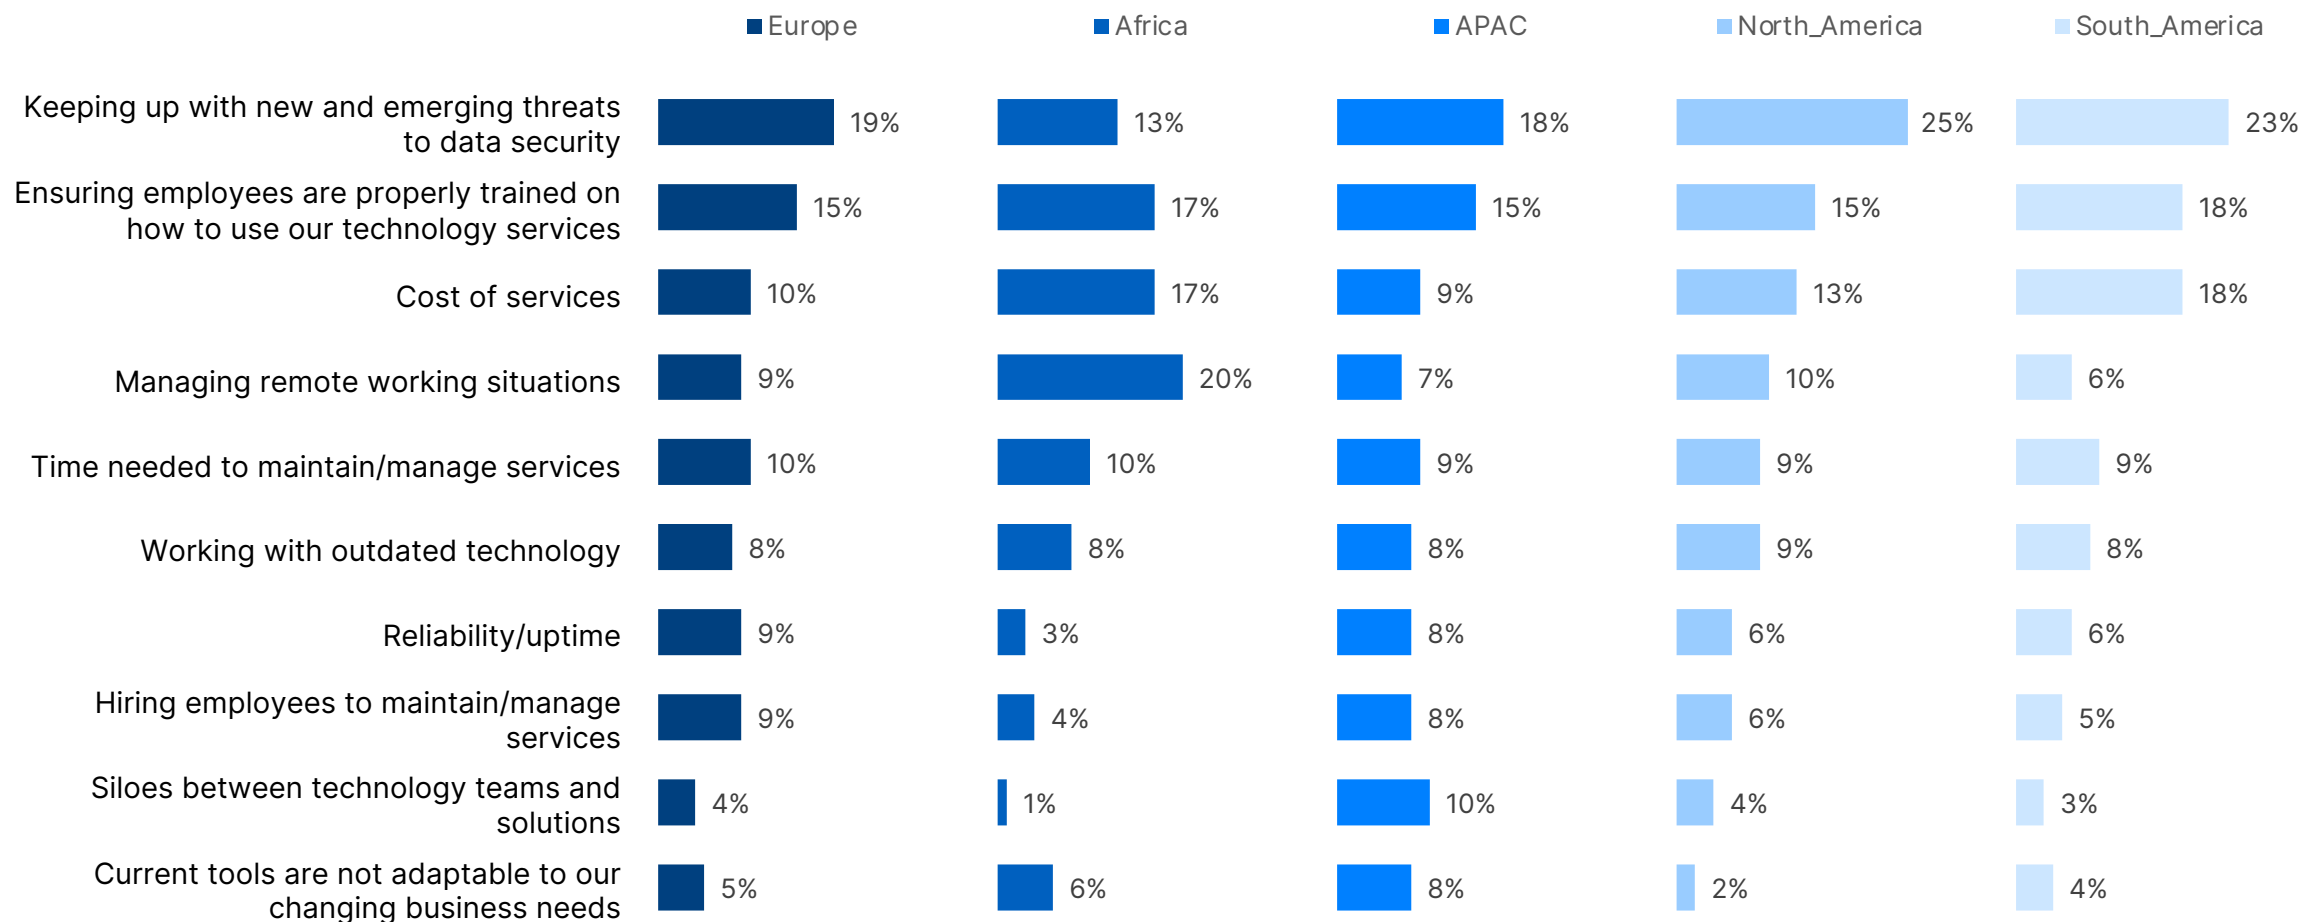

Technology challenges are second to the challenges of COVID-19 in all regions, except Europe, which is equally focused on the COVID-19 challenges and ensuring technology meets customers' needs.

Biggest Business Challenges

Technology concerns vary by region with security a major issue everywhere but Africa – where remote working tops the list

Top Technology Challenges

Q2 - What is the biggest challenge related to technology services (website and application hosting, software services, public cloud services, etc.) facing your business today? Europe N=388, Africa N=96, APAC N=684, NA N=451, SA N=399 Letters indicate a significant difference at the 95% confidence level

Security remains a concern in the US, India, Japan, and Singapore, but other concerns include costs in the US, training employees in India, reliability and hiring in Japan and the need for new tools in Singapore

Q2 - What is the biggest challenge related to technology services (website and application hosting, software services, public cloud services, etc.) facing your business today? US N=220, India N=300, Japan N=193, Singapore N=131 Letters indicate a significant difference at the 95% confidence level

We also see pronounced increases in cloud reliance due to COVID-19 in India and Singapore

Q5 - How has your business's reliance on cloud solutions, including cloud infrastructure services, software as a service solutions, and private cloud solutions, changed as a result of the COVID-19 pandemic? Q6 - And, how has your business's increased reliance on cloud solutions, including cloud infrastructure services, software as a service solutions, and private cloud solutions, changed just in 2021? US N=330, India N=300, Japan N=193, Singapore N=131 **Among those who increased reliance as a result of Covid

The cloud helped with remote work across all the countries we surveyed

Among those who found cloud solutions helpful...

	US	India	Japan	Singapore
Allowed for more virtual collaboration while employees work remotely	66%*	53%	51%	55%
Enabled us to move or increase business operations online (sales, scheduling, streaming, etc.)	59%*	53%*	32%	56%*
Provide a more stable platform and reduced the strain on internal servers	54%	46%	53%	56%
Maintained or increased IT security	55%*	46%	54%	49%
Enabled us to scale up/down services as needed	47%	40%	45%	51%*

Q8 - In what ways are cloud solutions, including cloud infrastructure services, software as a service solutions, and private cloud solutions helping your business recover from the business impacts of COVID-19? Among those whose business recovered with the help of cloud solutions. US N=222, India N=206, Japan N=92, Singapore N=118 Letters indicate a significant difference at the 95% confidence level

Study Methodology

Methodology

We conducted 2,400 interviews among tech decision makers in 48 different countries from Sept. 22 - Oct 14, 2021. The Surveys were conducted in English, Spanish, French, German, Italian, Portuguese, Mandarin, and Japanese. Additional sample was gathered in key countries to allow for a deep dive into these countries.

	Main Sample					Additional Sample in Key Countries			
	North America	South America	Europe	Africa	APAC	India	Singapore	Japan	United States
Enterprise	100	133	133	33	100	100	60	75	100
Tech-Focused Start-ups SMBs	100	133	133	33	100	99	45	75	116
Traditional SMB	100	133	124	30	100	101	26	43	114
TOTAL	300	399	390	96	300	300	131	193	330

Characteristics of 3 key subgroups

Enterprise companies – with 500 or more employees

Tech-focused SMBs – with under 500 employees who describe themselves as a tech or hybrid company

Traditional SMBs – with under 500 employees who describe themselves as a non-tech company

	Enterprise (500+ employees)	Tech-focused SMB (1-499 employees)	Traditional SMB (1-499 employees)
Sample Size	499	499	487
Average # of employees	906.2	147.6	79.1
Sole proprietor business	-	4%	28%

Traditional SMBs are more likely to embrace the “small business” label

Two-thirds of traditional SMBs say that they consider their business to be “small”, and while tech-focused SMBs are more likely to see themselves as “medium” – they both know they’re not playing in the same league as enterprise businesses.

Actual vs. Perceived company size

	Enterprise (500+ employees)	Tech-focused SMB (1-499 employees)	Traditional SMB (1-499 employees)
Describes their company as “a small business”	5%	31%	67%
Describes their company as “a medium-sized business”	38%	56%	26%
Describes their company as “a large corporation/enterprise business”	57%	12%	5%

Enterprise businesses are equally likely to consider themselves to be a “start up” as Tech-focused SMBs

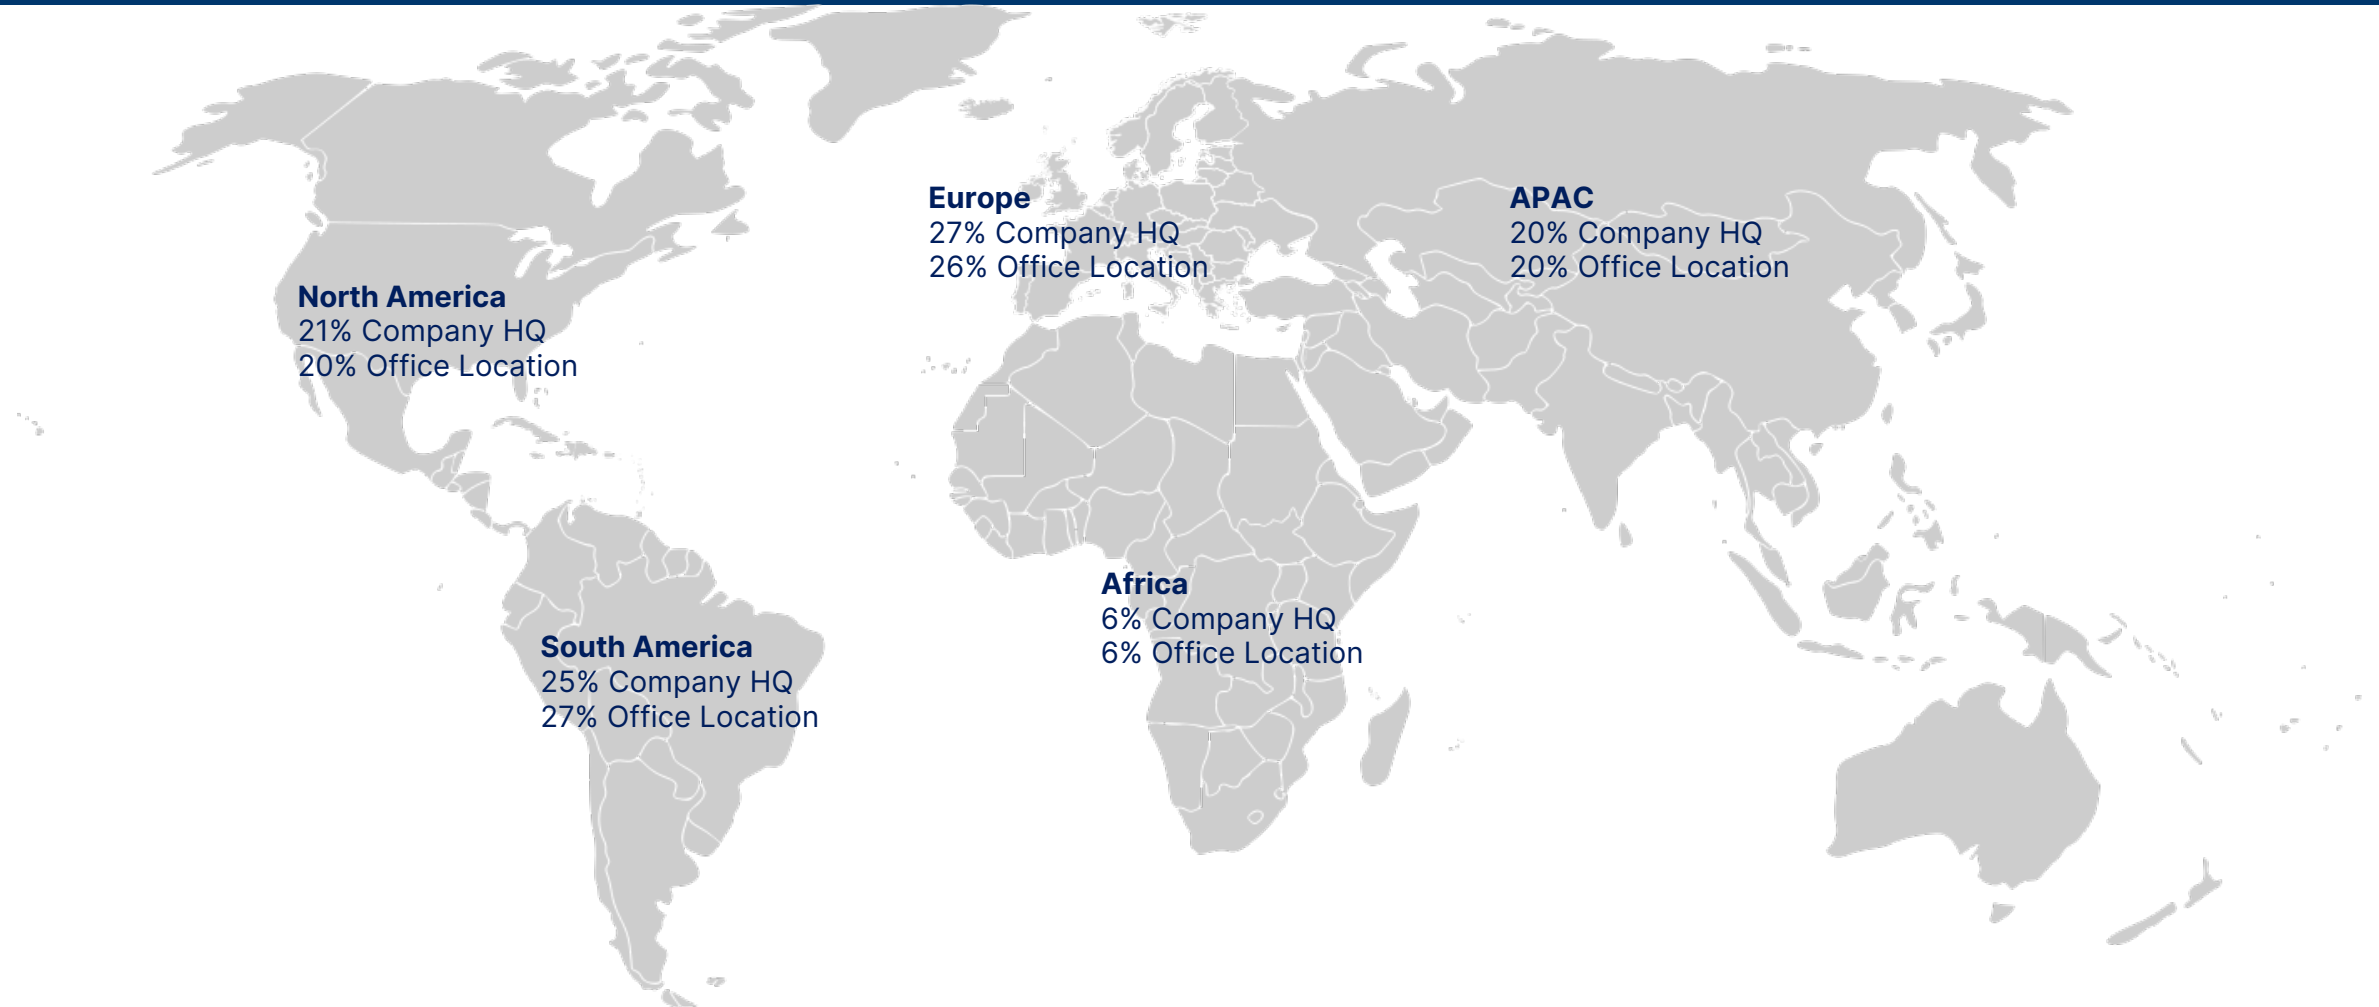

Consider Their Business a Start-up

Respondents' companies operate in a mix of industries, tech, non-tech and hybrid

They're located in 48 different countries with HQ's in over 50 countries

Most companies are privately held and solely funded by the founders

39% Have accepted funding from investors/private equity firms

52% Are solely funded by the founder(s)
